

Features

All-in-one, high-speed, curing and drying machine

Hands-free on/off operation with foot pedal

Water attachment is built into the machine

Advantages

No other lash brand can offer a freshening breeze of air with a water attachment that reduces the drying/curing time to only 60 seconds

Artists can save time by simultaneously curing and working on their client's lashes

- Conveniently designed to give artists all the components necessary to dry the adhesive
 - Provides the opportunity to customize the humidity levels in your lash room
-

Benefits

Enhances the artists' and the clients' drying and adhesive curing experience

Artists' can make more money by squeezing in one more appointment with the time that the AirNova saves

- With the detachable water tank, there is no need to reach for other products for the misting and curing of the adhesive
 - Stylists can use the water tank to raise the humidity levels in their workspace, which gives them control over how long their adhesive takes to dry
-
