

DRY HEAT STERILIZER

Features

Sturdy design with solid materials

Temperature reaches over 450 degrees Fahrenheit

15 seconds to sterilize

Advantages

Withstands repeated use without over-heating or breaking down

The only medical grade device that effectively sterilizes instruments

Effectively removes all microorganisms in 15 seconds vs other sanitizers that take longer and only reduce microorganisms

Benefits

The dry heat sterilizer is designed to last for years

- Artists will be able to provide the highest level of sterilization
 - Reduces the possibility of cross contamination from one client to another
-

With the fast sterilization rate, artists save time, which can be utilized for appointments or longer breaks
